

What are the threats to national sovereignty in a more globalised world?

Analysing synoptic charts

How are the carbon and water cycles linked to the global climate system?

University Degree/ Apprenticeship

What are the consequences for people and the environment of our increasing demand for energy?

How are nation states defined and how have they evolved in a globalising world?

Topic 7: Carbon cycle & Energy security

How does the carbon cycle operate to maintain planetary health?

What are the impacts of global organisations on managing global issues and conflicts?

What spheres of influence are contested by superpowers and what are the implications of this?

Proportional circles/ interpreting graphs

How does water insecurity occur and why is it becoming such a global issue for the 21st century?

Topic 8: Migration, Identity and Sovereignty

What are the impacts of globalisation on international migration?

What factors influence the hydrological system over short- and long-term timescales?

Constructing power indexes

What are the processes operating within the hydrological cycle from global to local scale?

Use qualitative and quantitative indicators

Topic 7: Superpowers

What are superpowers and how have they changed over time?

Topic 5: Water cycle & insecurity

What are the processes operating within the hydrological cycle from global to local scale?

Year 13

What are the impacts of superpowers on the global economy, political systems and the physical environment?

Why are there demographic and cultural tensions in diverse places?

Non Examined Assessment

How can coastlines be managed to meet the needs of all players?

How successfully are cultural and demographic issues managed?

How do coastal erosion and sea level change alter the physical; characteristics of coastlines and increase risks?

Chi-squared/ student t-test

How do different people view diverse living spaces?

How do characteristic coastal landforms contribute to coastal landscapes?

£

An in-depth study of the local place in which you live or study and one contrasting place

How do population structures vary?

Why are coastal landscapes different and what processes cause these differences?

Topic 2: Coastal landscapes & change

Fieldwork

Correlation techniques

Gini coefficient

The Lorenz curve

Flow-line maps

Rose diagrams

Measures of central tendency

Environmental impact assessments

What are the impacts of globalisation for countries, different groups of people and cultures and the physical environment?

Why do some tectonic hazards develop into disasters?

What are the consequences of globalisation for global development and the physical environment and how should different players respond to its challenges?

How successful is the management of tectonic hazards and disasters?

Field sketches

Topic 4: Diverse Places

Why are some locations more at risk from tectonic hazards?

What are the causes of globalisation and why has it accelerated in recent decades?

Topic 3 Globalisation

Topic 1: Tectonic Processes & Hazards

Year 12

Tectonics: How local and national governments have affected vulnerability and the resilience of communities to withstand hazards

- Paper 1 - Physical
- Paper 2 - Human
- Paper 3 - Synoptic

- Higher education SWB6th

Year 11

Year 10

Year 9

Year 8

Year 7
